

# Swathi Bandari

Bentonville, AR · Swathibandari1323@gmail.com · linkedin.com/in/swathi-bandari-269747350

## EDUCATION

### Master's in Business Analytics

Sacred Heart University, Connecticut

USA

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript

**Frameworks & Databases:** Spring Boot, Spring MVC, Spring Data, Hibernate, Node.js, DB2, PostgreSQL, MongoDB, BigQuery, Cosmos DB, MySQL

**Tools:** GCP (Cloud Storage), Azure, Docker, Looper, Concord, Kubernetes, Jenkins, Git, Maven, Kafka, Splunk, Prometheus, OpenObserve

**AI & Development Tools:** AI Code Assistants (Cursor, Windsurf, GitHub Copilot), Prompt Engineering, MCP, RAG

**Concepts:** Microservices, REST APIs, GraphQL APIs, Event-driven systems, Distributed Systems, System Design, Security & Authentication (JWT, OAuth)

## PROFESSIONAL EXPERIENCE

### Walmart | Software Engineer | Bentonville, Arkansas, USA

Oct 2024 – Present

- Developed and maintained backend microservices using Spring Boot, supporting Benefits Platform applications and ensuring reliable service communication.
- Designed highly performant GraphQL APIs alongside REST endpoints to serve unified data to downstream teams, powering critical business applications and reducing data retrieval latency by 45%.
- Worked on event-driven architecture using Kafka, handling application events and ensuring reliable message processing services.
- Implemented configuration-based changes using Spring Boot backend and React components, enabling flexible updates to application behavior without requiring frequent code changes.
- Established comprehensive observability frameworks utilizing Splunk, Prometheus, and OpenObserve across distributed microservices, accelerating incident response times and ensuring 99.9% platform availability.
- Leveraged AI-powered development tools (GitHub Copilot, Cursor) to accelerate code generation, automated testing, and documentation, improving development velocity by 35%.
- Optimized API performance through intelligent caching strategies and database query optimization, eliminating unnecessary calls across multiple data sources and improving response times.
- Collaborated with platform teams to implement secure authentication mechanisms using JWT and OAuth, managing configurations, secrets, and certificate updates for production deployments.

### Lowe's | Software Engineer | India

Aug 2020 – Dec 2022

- Developed scalable backend services and REST APIs using Java and Spring Boot for enterprise applications serving over 500K users, implementing robust authentication and authorization mechanisms.
- Architected microservices-based solutions improving system scalability and modularity, successfully migrating legacy monolithic architecture to cloud-native microservices on AWS.
- Engineered automated data pipelines utilizing AWS S3 for secure storage and processing, orchestrating ETL workflows to handle large-scale data transformations.
- Optimized database interactions using Hibernate and implemented advanced caching strategies, reducing database costs by 12% and improving query performance.
- Implemented CI/CD pipelines using Jenkins and Docker for continuous delivery, reducing deployment time by 40% and ensuring zero-downtime releases.

### Oracle | Software Engineer | India

Oct 2018 – Jul 2020

- Developed enterprise web applications using Java, Spring, and Hibernate frameworks, delivering secure and scalable solutions for financial services clients.
- Built REST and SOAP services for system integrations, implementing multi-factor authentication and reducing fraudulent activities through enhanced security measures.
- Designed interactive frontend components using HTML, CSS, JavaScript, and jQuery with responsive design principles for optimal user experience.
- Wrote optimized SQL queries and implemented database indexing strategies to improve application performance by 20% during peak traffic periods.
- Provided production support and resolved critical system issues through comprehensive log analysis and debugging, maintaining 99.5% system uptime.
